DETAILED ACTION

Abstract

The abstract of the disclosure is objected to because the abstract exceeds 150 words. Correction is required. See MPEP § 608.01(b).

Specification

The disclosure is objected to because of the following informalities:

1. The applicants refer to applications using attorney reference numbers, these need to be removed and US Patent numbers inserted.
2. The applicants submitted the specification which lacks page numbers, a substitute specification needs to be submitted which includes page numbers, no new matter shall be submitted.

Appropriate correction is required.

Response to Amendment

Art Unit: 2662

The applicants submitted a preliminary amendment which has not been considered because the specification lacks page numbers. Once a substitute specification is submitted the preliminary amendment will be considered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2662

I. Claims 1, 3-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,154,445. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following:

Regarding claim 1 of the application and claim 1 of the patent. Both claims are directed to monitoring a parameter (quality of service) and switching a telephone call from one network to the another network if the monitored parameter (quality of service) falls below a threshold. Both the application and the patent are directed to hybrid networks utilizing the PSTN and packet data networks.

The patent claim 1 does not expressly disclose the monitored parameter is a quality of service parameter.

At the time of the invention, it would have been obvious to ordinary person in the art to utilize quality of service as the monitored parameter since the patent suggests this in claim 6 of the patent and the benefit being that if one network cannot maintain the customer quality the call can be switched to another data network thus maintaining customer satisfaction and retaining customers and meeting customer service agreements.
